

The End to the organised armed militia groups; the massive violence and systematic rape against women and children; the constant killings of human rights activists, corruption whistle blowers and journalists; the general misery and sufferings of the population orchestrated by the on-going looting of state resources in the DRC, has got one and only one solution:

Dr. Etienne Tshisekedi, the people's choice for the upcoming November 2011 presidential poll in the Democratic Republic of Congo (DRC).

Dr. Etienne Tshisekedi, a real mass magnet, is dragging hundred thousands of Congolese people living abroad (Brussels, London, Montreal, Washington, Berlin...) and within various cities of the DRC (Lubumbashi, Kipushi, Kasumbalesa, Likasi, Kolwezi and Kinshasa...and many more to come). Already the opinion poll among Congolese of Diaspora put him ahead of his opponents.

On the 28th of this coming November, the people of the DRC will put an end to the current government so that the UPDS can

implement its program of alternative government that will:

1. Reinstate the authority of the State with the creation of a republican army and real national police forces.
2. Fight corruption and end red taping to allow investors access to enormous potential of the DRC and offer opportunity of job creation to Congolese people.
3. Fight the culture of immorality among Congolese people and introduce the sacrosanct principle of success in life on merit.
4. Rebuild public infrastructures (Hospitals, Schools, Universities, Colleges...) in partnership with the private sector...
5. Rebuild communication network in all its forms within this large country with the size of the Western Europe, in line with modern accepted norms together with responsible investors and international community...
6. Promote self sustainability of food and energy by empowering agriculture in the massive fertile land of the DRC and modernizing our hydroelectric capabilities (INGA, ZONGO...) together with responsible partners.
